

ROPE LIGHT EX

Unveiling a unique explosion-proof ROPE LIGHT

Introducing the new ex-proof LED rope light, designed specifically for work in hazardous areas. With a length of 25 m and an extremely high light output of 10.000 lumen, this LED rope light provides optimal lighting and maximum safety on the worksite.

You will be able to see clearly, stay focused, and get the job done with optimal lighting, whether you're in confined spaces, along pipe racks, doing inspection or repair work in tanks etc.

ROPE LIGHT EX comes with a practical handle and reel for easy winding up the rope light. A velcro cable strap ensures convenient storage when not in use. ROPE LIGHT EX is certified for use in ZONE 0/20.

Features and specifications

- Explosion-proof ATEX-certified for zone 0/20
- EMC certified and flicker-free
- High IP rating (IP65) and durable (IK07), impact resistance 1 m
- Operating temperature range: -20 to +40 °C
- Built-in power supply with over-temperature protection and 1.5 m cable
- Low voltage (24 V DC) for increased safety
- Operating voltage range: 100-240 V AC
- Total power consumption: 100 W
- 1.5 m rubber cable
- CCT: 5800 K, CRI: Ra >80
