OUR BRAND STORY

Have you ever realised that you don't actually know what you can't see?

It's like putting on new glasses or switching to high beams while driving and thinking: Oh, NOW I see!

That's exactly the feeling you get when SCANGRIP lights up your work.

We focus on work light – and work light only.

Coming from Denmark, where daylight is a rare luxury for much of the year, we know better than most what it means to depend on work light that truly works.

And that's exactly what we deliver. Our lights give you clarity, comfort, and the confidence to focus fully on your craft.

When you see every detail, you can do your best work.

Anyone who has tried working with a flashlight in their mouth, or left bulky lighting equipment in the car, knows that good work light can't be measured in lumens alone. Optimal sight is about understanding the way you work, the tasks you face, and the conditions you face them in. That's why we collaborate closely with industry professionals – the everyday experts who know what's needed when work gets tough. Their insights shape our innovations, so our products can stand beside you as reliable teammates – year after year.

At SCANGRIP, we take your work seriously.

That's why we make seriously good work light.

GOOD WORK LIGHT**

Rechargeable LED headlamp

I-VIEW is a powerful USB-C rechargeable LED headlamp designed for the professional user. As opposed to other headlamps providing a beam of light, I-VIEW is designed to illuminate your entire work area. 400 lumen with on / off sensor.

***"It shines so brightly that you can see everything.
Even the spiders must be wearing sunglasses!"***

Michael Fredberg (Electrician)

PRECISION LIGHT WHEREVER NEEDED

DESIGNED FOR THE ELECTRICIAN

As an electrician, you know the frustration of working in cramped or dark spaces, often with the power turned off for safety. Struggling to see wire colours, reading labels, or keeping a work light steady while both hands are busy can slow you down and increase the risk of mistakes.

That is why our range of hand and head lamps is designed with your needs in mind. Every work light in our collection is built tough to survive drops, dust, and the demanding conditions electricians face daily, so you can count on them to perform when you need them most.

Rechargeable LED penlight

WORK PEN R is a rechargeable penlight with dimmer function and built-in magnets. 200 lumen. A true companion for professional inspection work

"It fits perfectly in my pocket, and I take it with me everywhere"

Amalie Schwartz (Electrician)

KEEP THE LIGHT YOU LOVE

SCANGRIP is taking an ambitious strategic step forward by committing to developing LED work lights with minimized environmental impact while at the same time improving energy efficiency and expanding the lifespan.

5
years
warranty

FOR LIFE work lights are the most energy-efficient and long-lasting work lights available on the market and come with a range of enhanced features that provide numerous benefits to the end-user.

COMPLETE WORK LIGHT RANGE

ALWAYS THE RIGHT PRODUCT FOR YOU!

SCANGRIP covers the entire range of professional needs, from quick inspections to complex installation work. Our handheld lights are ideal for service tasks, while our headlamps provide hands-free precision in narrow spaces. Inspection lights offer illumination of objects in detail where accuracy matters most, and our floodlights deliver the power needed to illuminate large areas. Combined with flexible mounting systems and accessories, SCANGRIP provides a comprehensive lighting system.

On larger job sites, consistent and flexible lighting is essential for maintaining safety and productivity. We offer a wide range of lighting solutions that provide powerful, uniform area illumination, making it easier to navigate and operate across busy construction environments. Designed for practical use, our lights can be positioned and mounted in numerous ways.

NO MORE BATTERY HEADACHES

SCANGRIP CONNECT FITS ALL BATTERIES

CONNECT work lights can run on your favorite batteries from all the leading power tool brands, including AEG, AMPSHARE, BERNER, BOSCH, DEWALT, EINHELL, FEIN, FESTOOL, FLEX, HAZET, HIKOKI, HILTI, INGERSOLL, MAKITA, METABO, MILWAUKEE, PANASONIC, RIDGID, SNAP-ON, and WÜRTH.

The CONNECT series is engineered for professionals who demand adaptability and efficiency. Whether you need the freedom of cordless operation or the assurance of endless power from a cord, CONNECT adapts to your work and environment. No matter how long the job takes, with CONNECT you will always have the right power solution and brilliant, high-quality lighting using the batteries you already trust.

SCANGRIP is part of the CAS battery alliance.

EUROPE'S LEADING MANUFACTURER OF PROFESSIONAL WORK LIGHTS

SCANGRIP knows that serious work takes seriously good work light. For over a decade, SCANGRIP has set new standards in professional work lighting. Built on Danish engineering expertise and a strong commitment to innovation, we develop and manufacture high-performance work lights for skilled tradespeople who depend on reliable, powerful illumination every single day. Our purpose is clear: to help professionals work smarter, faster, and with uncompromising accuracy, whether they are installing, inspecting, repairing, or building.

Built for electricians, installers, and technical trades

Electricians and installers often find themselves working in tight, dark, or complex environments where standard lighting simply does not suffice. SCANGRIP lights are created with these realities in mind. Each product delivers exceptional brightness and uniform light output, ensuring optimal sight even in confined spaces. The robust construction is designed to withstand dust, impact, and demanding conditions on construction sites.
